

Precision in Every Pellet

NAMI
LIFESCIENCES

Welcome to **Nami Life**

We understand how challenging it is to stand out in today's highly competitive pharmaceutical landscape. At Nami Life Sciences, we believe the best way forward is through technological innovation and scientifically superior, more efficacious products.

For years, Nami Life Sciences has partnered with companies to create products that are not only scientifically sound but also technologically superior.

Our end-to-end pharmaceutical and nutraceutical capabilities—from development to delivery—are supported by advanced infrastructure and expert teams at our facility in India.

What we do

Nami Life Sciences is a technology-driven manufacturer specializing in pharmaceutical and nutraceutical pellets.

We offer end-to-end pellet formulation and manufacturing services, including controlled release, sustained release, and Multiple-Unit Pellet System (MUPS) designed for maximum bioavailability and therapeutic performance.

With fully integrated, in-house capabilities and state-of-the-art facilities in India, we ensure precision, consistency, and compliance in every batch.

Whether you're looking for a complete partnership from concept to commercial supply or specialized technology support for existing formulations, Nami Life Sciences delivers the flexibility and reliability you need.

We stay ahead of the curve by understanding market trends, formulation challenges, and emerging delivery technologies — enabling our partners to create products that stand out in both performance and value.

At Nami, we combine science, precision, and innovation to help you bring smarter, more effective pellet-based products to market.

| Nami-Nova

The strength of Nami Life Sciences lies in our people — a team of scientists, engineers, and regulatory experts with extensive experience in pharmaceutical and nutraceutical pellet manufacturing.

From formulation and process design to commercial production, our experts provide customized, science backed solutions that help us achieve precision and performance in every product.

At Nami, collaboration drives innovation. Our people don't just manufacture pellets — they engineer performance, ensuring every formulation meets the highest standards of quality, efficacy, and reliability.
